GCL GLOBAL RESOURCES SGP PTE. LIMITED AND ITS SUBSIDIARY

REPORT OF THE DIRECTORS AND FINANCIAL STATEMENTS
FINANCIAL YEAR ENDED 31 MARCH 2014

TABLE OF CONTENTS

REPORT OF THE DIRECTORS

The directors of the Company present their report to the member together with the audited financial statements of the Group for the financial year ended 31 March 2014, and the statement of financial position and statement of changes in equity of the Company as at 31 March 2014.

1. Directors

The directors of the Company in office at the date of this report are:

Shrinivas Vassudeva Sinai Dempo
Jagmohan Jagdishlal Chhabra
Geraldine Norris

2. Arrangements to enable directors to acquire shares or debentures

Neither at the end of nor at any time during the financial year was the Company a party to any arrangement whose objects were, or one of the objects was, to enable the directors of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

3. Directors' interests in shares or debentures

According to the register kept by the Company for the purposes of Section 164 of the Singapore Companies Act, Chapter 50 (the "Act"), the directors of the Company holding office at the end of the financial year had no interest in the shares or debentures of the Company and its related corporation except as stated below:

	Ordinary Shares	
Name of director and corporation in which interests are held	**Holdings at beginning of financial year**	**Holdings at end of financial year**
Ultimate holding company Goa Carbon Ltd.		
Shrinivas Vassudeva Sinai Dempo	383,100	395,939

4. Directors' contractual benefits

Since the end of the previous financial year, no director of the Company has received or become entitled to receive a benefit which is required to be disclosed under Section 201(8) of the Act, by reason of a contract made by the Company or a related corporation with the director or with a firm of which he is a member, or with a company in which he has a substantial financial interest, except as disclosed in the accompanying financial statements and that certain directors received remuneration from related corporations in their capacity as directors and/or executives of those related corporations.

5. **Share options**

There were no options granted by the Company or its subsidiary during the financial year.

There were no shares issued during the financial year by virtue of the exercise of options to take up unissued shares of the Company or its subsidiary.

There were no unissued shares of the Company or its subsidiary under option at the end of the financial year.

6. **Auditors**

Mazars LLP have expressed their willingness to accept re-appointment as auditors.

REPORT OF THE INDEPENDENT AUDITORS TO THE MEMBER OF GCL GLOBAL RESOURCES SGP PTE. LIMITED

Report on the Financial Statements

We have audited the accompanying financial statements of GCL Global Resources Sgp Pte. Limited (the "Company") and its subsidiary (the "Group"), which comprise the statement of financial position of the Group and the Company as at 31 March 2014, and the statements of profit or loss and other comprehensive income, changes in equity and cash flows of the Group and changes in equity of the company for the financial year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Singapore Companies Act, Chapter 50 (the "Act") and Singapore Financial Reporting Standards, and for devising and maintaining a system of internal accounting controls sufficient to provide reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair profit and loss accounts and balance sheets and to maintain accountability of assets.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Singapore Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal controls relevant to the entity's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

The annexed notes form an integral part of and should be read in conjunction with these financial statements.

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

1. General

GCL Global Resources SGP Pte. Limited is a company incorporated and domiciled in Singapore with its registered office at 133 Cecil Street, #16-01 Keck Seng Tower, Singapore 069535.

The principal activities of the Company are investment holding company and general wholesale trading.

The principal activities of the subsidiary are disclosed in Note 7 to the financial statements.

The Company's ultimate holding company is Goa Carbon Limited, a company incorporated in India.

The consolidated financial statement of the Group and the statement of financial position for the financial year ended 31 March 2014 were authorised for issue by the Board of Directors on __________.

2. Summary of significant accounting policies

2.1 Basis of preparation

These financial statements have been prepared in accordance with provisions of the Singapore Companies Act, Chapter 50 (the "Act") and Singapore Financial Reporting Standards ("FRS") including related Interpretation of FRS ("INT FRS") on a historical basis except ad disclosed in the accounting policies below.

The individual financial statements of each Group entity are measured and presented in the currency of the primary economic environment in which the entity operates (its functional currency). The consolidated financial statements of the Group and the statement of financial position of the Company are presented in Singapore dollar ("S$") which is also the functional currency of the Company, and all values presented are in units, unless otherwise indicated.

In the current financial year, the Company adopted all the relevant FRS and Interpretation to FRS ("INT FRS") that are mandatory for application from that date. The adoption of the new/revised FRSs did not have any impact on the financial statements.

2. Summary of significant accounting policies (Continued)

2.1 Basis of preparation (Continued)

FRS and INT FRS issued but not yet effective

At the date of authorisation of these statements, the following FRS and INT FRS that are relevant to the Group were issued but not yet effective:

		Effective date (annual periods beginning on or after)
FRS 32	Amendments to FRS 32 – Offsetting of financial assets and financial liabilities	1 January 2014
FRS 36	Amendments to FRS 36: Recoverable amount disclosures for non-financial assets	1 January 2014

The management anticipates that the adoption of the above FRS and INT FRS in future periods will not have a material impact on the financial statements, and in particular, to the financial position and financial performance, of the Group in the period of their initial adoption.

2.2 Basis of consolidation

The financial statements of the Group comprise the financial statements of the Company and its subsidiary. Subsidiary is entity (including special purposes entities) over which the Group has the power to govern the financial and operating policies, generally accompanied by a shareholding of more than one half of the voting rights.

Subsidiary is consolidated from the date on which control is transferred to the Group up to the effective date on which control ceases, as appropriate.

Intra-group balances, transactions, income and expenses are eliminated on consolidation.

The financial statements of the subsidiary used in the preparation of the financial statements are prepared for the same reporting date as that of the Company. Where necessary, accounting policies of subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Any differences between the amount by which the non-controlling interests are adjusted to reflect the changes in the relative interests in the subsidiary and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the Company.

2. Summary of significant accounting policies (Continued)

2.2 Basis of consolidation (Continued)

When the Group loses control over a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. Amounts previously recognised in other comprehensive income in relation to the subsidiary are accounted for (i.e. reclassified to profit or loss or transferred directly to retained earnings) in the same manner as would be required if the relevant assets or liabilities were disposed of. The fair value of any investments retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under FRS 39 Financial Instruments: Recognition and Measurement or, when applicable, the cost on initial recognition of an investment in an associate or jointly controlled entity.

Investments in subsidiary are carried at cost less any impairment loss that has been recognised in profit or loss.

2.3 Business combinations

<u>Business combinations from 1 January 2010</u>

The acquisition of subsidiaries is accounted for using the acquisition method. The cost of the acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under FRS 103 *Business Combinations* ("FRS 103") are recognised at their fair values at the acquisition date, except for non-current assets (or disposal groups) that are classified as held-for-sale in accordance with FRS 105 *Non-Current Assets Held for Sale and Discontinued Operations* ("FRS 105"), which are recognised and measured at the lower of cost and fair value less costs to sell.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under FRS 103 are recognised at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with FRS 12 *Income Taxes* and FRS 19 *Employee Benefits* respectively;

- liabilities or equity instruments related to the replacement by the Group of an acquiree's share-based payment awards are measured in accordance with FRS 102 Share-based Payment; and

- assets (or disposal groups) that are classified as held for sale in accordance with FRS 105 are measured in accordance with that Standard.

2. Summary of significant accounting policies (Continued)

2.3 Business combinations (Continued)

Business combinations from 1 January 2010 (Continued)

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see below), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

The measurement period is the period from the date of acquisition to the date the Group obtains complete information about facts and circumstances that existed as of the acquisition date, and is subject to a maximum of one year.

Goodwill arising on acquisition is recognised as an asset at the acquisition date and is initially measured at cost, being the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer previously held equity interest (if any) in the entity over net acquisition-date fair value amounts of the identifiable assets acquired and the liabilities assumed.

If, after reassessment, the Group's interest in the net fair value of the acquiree's identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held equity interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

2.4 Income tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are not taxable or tax deductible. The Group's liability for current tax is calculated using tax rates (and tax laws) that have been enacted or substantively enacted in countries where the Company and subsidiaries operate by the end of the financial year.

Deferred tax is recognised on the differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised on taxable temporary differences arising on investments in subsidiaries except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

2. Summary of significant accounting policies (Continued)

2.4 Income tax (Continued)

The carrying amount of deferred tax assets is reviewed at the end of each financial year and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised based on the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the financial year and based on the tax consequence that will follow from the manner in which the Group expects, at the end of the financial year, to recover or settle the carrying amounts of its assets and liabilities except for the investment properties where investment properties measured at fair value are presented to be recovered entirely through sale. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised as an expense or income in profit or loss, except when they relate to items credited or debited directly to equity, in which case the tax is also recognised directly in equity, or where they arise from the initial accounting for a business combination. In the case of a business combination, the tax effect is taken into account in calculating goodwill or determining the excess of the acquirer’s interest in the net fair value of the acquiree’s identifiable assets, liabilities and contingent liabilities over cost.

Revenue, expenses and assets are recognised net of the amount of sales tax except:

- when the sales tax that is incurred on purchases is not recoverable from the tax authorities, in which case the sales tax is recognised as part of cost of acquisition of the asset or as part of the expense item as applicable; and

- Receivables and payables that are stated with the amount of sales tax included.

2.5 Foreign currency transactions and translation

Foreign currency transactions are translated into the individual entities’ respective functional currencies at the exchange rates prevailing on the date of the transaction. At the end of each financial year, monetary items denominated in foreign currencies are retranslated at the rates prevailing as of the end of the financial year. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on retranslation of monetary items are included in profit or loss for the year. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the year except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in equity. For such non-monetary items, any exchange component of that gain or loss is also recognised directly in equity.

2. Summary of significant accounting policies (Continued)

2.6 Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses. The cost of plant and equipment includes its purchase price and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Dismantlement, removal or restoration costs are included as part of the cost of plant and equipment if the obligation for dismantlement, removal or restoration is incurred as a consequence of acquiring or using the plant and equipment.

Depreciation is charged so as to write off the cost or valuation of assets, other than freehold land and properties under construction, over their estimated useful lives, using the straight-line method, on the following base:

- Computers 33.33%

No depreciation is charged on construction-in-progress as they are not yet in use as at the end of the financial year.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The estimated useful lives, residual values and depreciation methods are reviewed, and adjusted as appropriate, at the end of each financial year.

2.7 Impairment of tangible assets

The Group reviews the carrying amounts of its tangible assets as at each reporting date to assess for any indication of impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

The recoverable amount of an asset or cash-generating unit is the higher of its fair value less costs to sell and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss for the amount by which the asset's carrying amount exceeds the recoverable amount is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

2. Summary of significant accounting policies (Continued)

2.8 Financial instruments

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial instrument and allocating the interest income or expense over the relevant period. The effective interest rate exactly discounts estimated future cash receipts or payments (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial instrument, or where appropriate, a shorter period, to the net carrying amount of the financial instrument. Income and expense are recognised on an effective interest basis for debt instruments other than those financial instruments at fair value through profit or loss.

Financial assets

All financial assets are recognised on a trade date - the date on which the Group commits to purchase or sell the asset. They are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

Financial assets are classified into loans and receivables. The classification depends on the nature and purpose for which these financial assets were acquired and is determined at the time of initial recognition.

Loans and receivables

The Group's loans and receivables comprise other receivables and cash and bank balances.

Such loans and receivables are non-derivatives with fixed or determinable payments that are not quoted in an active market. They are measured at amortised cost, using the effective interest method less impairment. Interest is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of each financial year. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted.

For financial assets carried at amortised cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

2. Summary of significant accounting policies (Continued)

2.8 Financial instruments (Continued)

Financial assets (Continued)

Impairment of financial assets (Continued)

The carrying amounts of all financial assets are reduced by the impairment loss directly with the exception of trade receivables where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds receivables.

Financial liabilities and equity instruments

Classification as debt or equity

Financial liabilities and equity instruments issued by Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

Financial liabilities

Financial liabilities are classified as either financial liabilities at fair value through profit or loss or other financial liabilities.

Financial liabilities are classified as at fair value through profit or loss if the financial liability is either held for trading or it is designated as such upon initial recognition.

2. Summary of significant accounting policies (Continued)

2.8 Financial instruments (Continued)

Financial liabilities and equity instruments (Continued)

Other financial liabilities

Other payables

Other payables and amount owing to ultimate holding company are initially measured at fair value, net of transaction costs, and are subsequently measured at amortised cost, where applicable, using the effective interest method, with interest expense recognised on an effective yield basis.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire.

2.9 Cash and cash equivalents

Cash and cash equivalents comprise cash and bank balances which are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value.

3. Critical accounting judgements and key sources of estimation uncertainty

The Group made judgements, estimates and assumptions about the carrying amounts of assets and liabilities that were not readily apparent from other sources in the application of the Group's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors that are considered to be reasonable under the circumstances. Actual results may differ from the estimates.

3.1 Critical judgements made in applying the Group's accounting policies

Determination of functional currency

The Group measures foreign currency transactions in the respective functional currencies of the Company and its subsidiary. In determining the functional currencies of the respective entities in the Group, judgement is required to determine the currency that mainly influences sales prices of goods and services and of the country whose competitive forces and regulations mainly determines the sales prices of its goods and services. The functional currencies of the entities in the Group are determined based on the local management's assessment of the economic environment in which the entities operate and the respective entities' process of determining sales prices.

3. Critical accounting judgements and key sources of estimation uncertainty (Continued)

3.2 Key sources of estimation uncertainty

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Impairment of investment in subsidiary

At the end of each financial year, an assessment is made on whether there is objective evidence that the Company's investment in the subsidiary is impaired. The management's assessment is based on fair value less cost of disposal. The Company's carrying amount of investments in subsidiary as at 31 March 2014 was S$4,106,755 (2013: S$2,439,143) (Note 7).

4. Loss before taxation

Loss before taxation has been arrived at the following charging/(crediting):-

	Group	
	2014 S$	2013 S$
Professional fees	2,899	12,057
Foreign exchange (gain)/loss	(8,093)	18,876
Miscellaneous expenses	-	4,497

5. Income tax expense

There is no income tax expense as the Group is in tax loss position and has no chargeable income.

	Group	
	2014 S$	2013 S$
Loss before taxation	(11,079)	(49,775)
Tax at statutory rate of 17%	(1,883)	(8,462)
Tax effect of non-deductible expenses	1,883	8,462
Tax expense	-	-

6. Plant and equipment

Group	Computer S$	Construction-in-progress S$	Total S$
Cost			
At 1 April 2012	-	-	-
Additions	-	270,000	270,000
At 31 March 2013	-	270,000	270,000
Additions	1,218	541,264	542,482
At 31 March 2014	1,218	811,264	812,482

As at the financial year, the subsidiary, Goa Carbon (Cangzhou) Co., Ltd have entered into agreement with third parties for conducting bankable feasibility study and design for petroleum coke calcination plant with capacity of 300,000 tonnes per annum.

15. Related party transactions

A related party is defined as follows:

(a) A person or a close member of that person's family is related to the Company if that person:

(i) Has control or joint control over the Company;
(ii) Has significant influence over the Company; or
(iii) Is a member of the key management personnel of the Company or of a parent of the Company.

(b) An entity is related to the Company if any of the following conditions applies:

(i) The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);
(iii) Both entities are joint ventures of the same third party;
(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;
(v) The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company. If the Company is itself such a plan, the sponsoring employers are also related to the Company;
(vi) The entity is controlled or jointly controlled by a person identified in (a);
(vii) A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Key management personnel

The key management personnel comprise the directors of the Company who did not receive any compensation during the financial year.

16. Financial risk management and objectives

Risk management is integral to the whole business of the Group. The Group has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The management continually monitors the Group's risk management process to ensure that an appropriate balance between risk and control is achieved.

Credit risk

Credit risk refers to the risk that the counterparty will default on its contractual obligations resulting in a loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group performs ongoing credit evaluation of its counterparties' financial condition and generally does not require a collateral.

The Group's and the Company's major classes of financial assets and bank balances and other receivables.

The maximum credit risk is represented by the carrying amount of each financial assets in the statement of financial position.

16. Financial risk management and objectives (Continued)

Foreign currency risk

The Group is exposed to foreign currency risk on certain expenses, monetary assets and liabilities that are denominated in currencies other than functional currencies of the respective entities in the Group. The currencies giving rise to this risk are primarily the Chinese Renminbi and United States dollar. The Group does not have any derivative financial instruments to hedge its foreign currency risk. The Group's exposure to foreign currency risk relates mainly to its operation in the PRC, which are transactional in Chinese Renminbi. The Chinese Renminbi is not freely convertible into foreign currencies.

As at end of reporting date, the carrying amounts of the Group's and Company's foreign currency denominated monetary assets and monetary liabilities are as follows:

	Group		Company	
	2014	2013	2014	2013
	S$	S$	S$	S$
Monetary assets				
United States dollar	144,747	540,101	35,026	-
Chinese Renminbi	3,743,224	2,464,791	-	-
Monetary liabilities				
Chinese Renminbi	433,879	210,577	-	-

Foreign currency sensitivity analysis

The Group is mainly exposed to Chinese Renminbi ("RMB").

The following table details the Group's sensitivity to a 10% change in RMB against the respective functional currencies of the Group entities. The sensitivity analysis assumes an instantaneous 10% change in the foreign currency exchange rates from the end of the financial year, with all variables held constant. The results of the model are also constrained by the fact that only monetary items, including external loans and loans to foreign operations, which are denominated in United States dollars ("USD") are included in the analysis. Consequentially, reported changes in the values of some of the financial instruments impacting the results of the sensitivity analysis are not matched with the offsetting changes in the values of certain excluded items that those instruments are designed to finance or hedge.

	Increase/(Decrease) Profit/(loss) before tax			
	Group		Company	
	2014	2013	2014	2013
	S$	S$	S$	S$

Weakens against S$	(14,747)	(54,010)	(3,502)	-
RMB				
Strengthens against S$	332,035	225,421	-	-
Weakens against S$	(332,035)	(225,421)	-	-

16. Financial risk management and objectives (Continued)

Liquidity risk

Liquidity risks refer to the risks in which the Group encounters difficulties in meeting its short-term obligations. Liquidity risks are managed by matching the payment and receipt cycle.

Adequate financial support from the ultimate holding company has been obtained to enable the Company to continue its operation and discharge its present obligations as and when they fall due. As a result, management does not foresee the Company is exposed to any significant liquidity risk.

17. Fair value of assets and liabilities

The carrying amount of cash and cash equivalents and other receivables, amount owing to ultimate holding company and payables, approximate this respective fair values due to the relative short term maturity of their financial instruments.

18. Capital management policies and objectives

The Company does not have specific capital policy and objective. The Company's capital requirement is met via advance from the ultimate holding company to meet the Company's operating requirements.

The Company's strategy remains unchanged from 2013.

The Company is not subject to any externally imposed capital requirements for the years ended 31 March 2014 and 2013.
