Management Discussion and Analysis

BUSINESS OUTLOOK

International competitive market environment continues to put pressure on the company's selling prices of products. The sharp increase in Raw Material prices consequent upon the price movement of crude oil and steep increase in freight rates will affect the margin of the company's products adversely. The company is making concerted effort to contain overhead cost and improve efficiencies.

The Company is a very well established and reliable manufacturer of Calcined Petroleum Coke in the market through its sustained efforts and emphasizes on product quality, continuing improvements and competitive pricing. Operational efficiency, Cost effectiveness, increase in export market and optimum utilization of production capacity will be major factors for the business growth and profitability for the year ahead.

FINANCE AND FINANCIAL RISKS

Financial risks could include high foreign currency exposure arising from payment for raw materials vis-à-vis export earnings. The company being a net user of foreign exchange is vulnerable to depreciation in the value of the rupee.

As a measure of prudent foreign exchange management and as a matter of policy, the company does not speculate on foreign currencies except booking for forward cover for import payments. Imports on revenue account are paid, as and when due, by market purchase of foreign exchange and also partially out of export earnings.

SIGNIFICANT ECONOMIC CHANGES THAT MATERIALLY AFFECT OR (ARE LIKELY TO) AFFECT INCOME FROM CONTINUING OPERATIONS.

The Company's raw material prices are driven by international crude oil prices as the sourcing of raw materials is from local/ imports from refineries / international trades. The prices are prone to fluctuations due to crude oil prices and foreign exchange fluctuations. Similarly, the prices of finished product of the company, Calcined Petroleum Coke are also driven by international prices and import tariff structures. The margins on these products vary widely without any consistency; the revenues of the company will therefore fluctuate from year to year. These economic changes could significantly affect income from continuing operations.

KNOWN TRENDS OR UNCERTAINTIES THAT HAVE HAD OR EXPECTED TO HAVE A MATERIAL ADVERSE IMPACT ON SALES, REVENUES, OR INCOME FROM CONTINUING OPERATIONS.

Uncertainty prevails in availability of continuous supply of raw material to the company. Occasionally, few raw materials though available are at uneconomical prices, which result in severe pressure on margins and values.

In addition to the above, high foreign currency exposure which is vulnerable to depreciation of Rupee and expected hardening of interest rates may affect Company's operations, margins and profits.

FUTURE CHANGES IN RELATIONSHIP BETWEEN COSTS AND REVENUES

The recent trend in continuous increase in international prices of raw materials compared to the prices of finished products may further shrink margins in future. Following the steep increase in price of crude oil during the past years, the cost of raw material also rose substantially.

With reduction of custom duty and by entering long-term contract with the raw petroleum coke suppliers for supply of raw material, the reasonable portion of such increase will be curtailed by the company. On the financial front the company is taking steps towards better working capital management and financial re-structuring for reducing the interest cost.

There has been no announcement of any new products or business segment.
